Education

Amrita Vishwa Vidyapeetam, Amaravati

B.Tech in Computer Science and Engineering (Artificial Intelligence), CGPA: 8.42/10

Sep 2024 – Present

Andhra Pradesh

VIT Junior College

Intermediate (MPC), 985/1000

2022 – 2024

Andhra Pradesh

Oxford School

Secondary School Certificate (SSC), 565/600

2021 – 2022

Andhra Pradesh

Technical Skills

Languages: Java • Python • C • JavaScript • SQL
Frameworks & Libraries: Java Swing • OpenCV • Scikit-learn • Pandas • TensorFlow Java API
Web Technologies: HTML • CSS • JavaScript
Databases: MySQL
Developer Tools: Git • GitHub • Linux • VS Code
Cloud & Tools: AWS • Linux • Git • GitHub

Projects

AI-Powered Human Activity Recognition (HAR) Platform

2026

Python | TensorFlow | Streamlit | Scikit-learn | Pandas | NumPy | Plotly

- Built an end-to-end human activity recognition system comparing CNN, LSTM, GRU, and ANN models on wearable sensor data.
- Shipped an interactive Streamlit dashboard supporting dataset upload, visualization, model comparison, and real-time prediction.
- Optimized the pipeline with caching and a modular architecture, streamlining preprocessing, feature engineering, and evaluation.

Drone Simulation System

2026

Python | Tkinter | Three.js

- Engineered a desktop drone simulation with waypoint navigation and real-time 3D visualization using Three.js.
- Implemented real-time coordinate updates and route prediction across simulated flight paths.
- Designed a Tkinter control panel and validated the system across multiple flight scenarios.

Logo Detector (Original vs. Fake)

2025

Java | OpenCV | TensorFlow Java API | MySQL | Swing

- Built a CNN-based desktop application that achieved 94% classification accuracy across 1,200 logo images.
- Delivered a Java Swing interface with OpenCV-based preprocessing for real-time prediction.
- Integrated MySQL to persist prediction history and generate reports.

Experience

AENEXZ

2026 – Present

Generative AI Exploration Intern

Remote

- Learned the fundamentals of Large Language Models (LLMs), Prompt Engineering, and Retrieval-Augmented Generation (RAG) through hands-on projects and guided training.
- Designed, tested, and refined prompts for tasks including summarization, question answering, text generation, and information extraction.
- Explored prompt optimization techniques, evaluated LLM responses, and documented effective prompting strategies and best practices.

Deloitte Australia (via Forage)

June 2026

Data Analytics Job Simulation

Remote

- Built an interactive Tableau dashboard as part of a data analytics and forensic technology simulation to surface business insights from raw datasets.
- Cleaned, classified, and analyzed data in Excel, delivering actionable business recommendations.

Certifications

- AWS Cloud Practitioner (In Progress) — AWS
- Linux Essentials — Cisco
- Prompt Engineering Fundamentals — Infosys Springboard
- Introduction to Responsible AI — Google Cloud
